PROFILE

Creative, goal-oriented professional eager to take the next step on a security networking journey. 📱⚡

Quick learning and excited to sharpen skills in the field. 🗨️📖

Educated in both computer networking and cybersecurity. 🖥️🔒

Interested in exploring leadership positions after gaining further practical experience. 🤝👉

Based in Texas, but willing to relocate in North America, Canada, or Australia. 🌐🧳

WORK EXPERIENCE

NETWORK SECURITY SOLUTIONS INTERN

TalonFour Cyber Labs / Remote, South Australia

Assisted with network maintenance, as well as the implementation of adequate security standards and the development of automation to facilitate the secure deployment of new hardware.

- Assisted with network maintenance to guarantee high uptime.

- Developed instruments to assist in upholding suitable security requirements.

- Maintaining security upgrades and pushing fixes to network computers.

- Investigated network and security issues to find their root cause, then executed corrective measures.

LEAD FIELD AGENT (NORTH DAKOTA)

Geek Squad / Bismarck, ND, United States

Supervised a small team that provided solutions for home and commercial clients, including VoIP, video, networking, and audio technologies.

- Implemented a range of technical solutions for clients while supervising a small staff.

- Installed video and hi-fi audio solutions for home and business clients in a range of settings. The solutions involved both hardware and software, and was tailored to each specific environment.

- Installed networking systems for residential and commercial clients, assuring excellent uptime and compliance with security standards.

- Provided clients with instructions on how to operate installed systems while converting high-level technical language into a more user-friendly format.
